

TANIT XR

Scan the Past. Empower People. Shape the Future.

CULTURAL
MEMORY

PRESERVED BY
DIGITAL TECH

This symbol was used for the goddess Tanit in ancient Carthage. We are proud to represent her in our logo.

Using XR to Preserve Global Heritage

As climate change, conflict, and neglect threaten historic sites like ancient ruins, our shared global heritage is at risk. XR—a term that includes augmented and virtual reality—offers powerful tools to help.

Our founder, Ines Said, is a Tunisian XR developer who takes inspiration from the goddess Tanit as she works to preserve the historic ruins she grew up loving.

We train volunteers in Tunisia in photogrammetry skills to capture scans on the ground, and then students and skilled volunteers worldwide use these scans to create a virtual museum.

If we can protect heritage in Tunisia—using immersive technology, community storytelling, and local leadership—we can build a model to safeguard cultural sites around the world.

Support our Mission

Email info@tanitxr.org to get in touch, and if you'd like to donate, we can process tax-deductible donations through our nonprofit fiscal sponsor.
